

A Ravish Radish plot produces a youngster's first whitetail.

Pictured is Wyatt Dial, of Effingham, Illinois. He recently killed his first deer over your Ravish Radish, which we planted in August. Wyatt killed his deer with a Ravin crossbow after a “grueling” five-minute hunt opening day. His family has used Whitetail Institute products

since the beginning in the 1980s, and they have accounted for many exciting moments for the Dial family and friends. Keep up the good work. It's much appreciated.
