

MY TROPHY WHITETAILS

NICK BREIER | WISCONSIN

T-JIM | LOUISIANA

TODD HANDELAND | WISCONSIN

THE AMBASSADORS

■ My good friend Todd Handeland and I are avid Whitetail Institute food plotters and habitat management constituents. We harvested great bucks from our Whitetail Institute plots this past year and wanted to share them with you. Todd hunts in North Dakota and harvested the nontypical pic-

tured here. It grossed 211-4/8 inches B&C. He took it with his rifle on the last day of the season.

I shot my 10-point typical over a Tall Tine Tuber plot with my bow in southwestern Wisconsin. It rough-scored 155 inches.

The third photo shows my buddy from Louisiana, who came up this past fall and harvested a mid-140s 10-point off my Fusion perennial plot from our southwestern Wisconsin farm.

We have a running joke that we are ambassadors of the Whitetail Institute because we wear your hats everywhere and are constantly talking about food plots and deer hunting.
