

TIMOTHY DEHAAN | INDIANA

■ After eight years of thinking my little hunting property would produce bigger deer, I finally planted food plots in 2020. I planted maybe 3 to 4 acres, and our trail cams showed at least four shootable bucks with 8-plus points. I shot the biggest deer of my life, and so did my buddy. I had countless deer all over me. I plan on planting the same — plus more — acreage in the future.
